

Alcohol Tester

Description

KAT-200 Alcohol Tester is used for measuring blood alcohol content (BAC) and is suitable for use in law enforcement agencies. It features LCD display with light backup for clear indication and provides quick response within 5 seconds. The device uses high-precision semiconductor sensor and offers direct testing process with LCD indication. It includes audio warning beyond pre-set limit and battery saving design with low voltage indication. The unit is portable with fashion design and ensures stable performance with SMT assembling and smart MCU control.

Features

- Advanced flat surfaced alcohol sensor
- Quick response and resume
- SMT assembling, stable performance
- Smart MCU control
- Direct testing process LCD indication
- Digital LCD display with light Orange backup
- Portable and fashion design
- Audio warning beyond pre-set limit
- Battery saved design, low voltage indication

Applications

- Law enforcement agencies
- Alcohol detection and monitoring
- Safety compliance testing

Uses

- To measure blood alcohol content (BAC)
- To perform alcohol testing for enforcement and safety

KAT-200

Technical Specifications

Parameter	Specification
Usage/Application	Law Enforcement Agencies
Name	KAT-200
Brand	KLABS
Warning Signal	Beep
Display	LCD Display
Type Of Mouthpiece	Replaceable
Model Type	Fuel-Cells Sensor Models
Analyzing Time	5 seconds
Color	Silver
Dimensions	118x68x29mm
Country of Origin	Made in India
Sensor Type	High-precision Semiconductor Sensor
Accessories	5 replaceable mouthpieces and 12v DC adaptor
