

Auto Titrator

Description

Auto Titrator is designed for laboratory applications and is constructed using mild steel material. The instrument features a digital display for clear and easy observation of readings. It operates on AC supply and works at a voltage of 3.7V. The unit comes in black color with box type packaging, making it suitable for laboratory usage.

Features

- Mild steel construction
- Digital display
- AC supply operation
- Compact design
- Suitable for laboratory applications

Applications

- Laboratory analysis
- Chemical testing processes
- Educational and research laboratories

Uses

- To perform titration processes in laboratory
- To support analytical procedures

KAT-37

Technical Specifications

Parameter	Specification
Material	Mild Steel
Model Name/Number	KAT-37
Usage/Application	Laboratory
Color	Black
Packaging Type	Box
Display Type	Digital
Supply	AC
Voltage	3.7V
