

KLABS Digital Spirit Level

Product Description

The KLABS PRO-DL120 Digital Spirit Level is a precision measurement instrument designed for accurate leveling and alignment applications in industrial, construction, engineering, workshop, and laboratory environments. The instrument features an illuminated digital display, machined measuring edges, automatic backlight, and high-accuracy measurement capability for reliable and convenient operation.

Features

- Digital spirit level measurement
- Illuminated digital display
- High accuracy leveling
- Machined edges for precise measurement
- Automatic backlight function
- Compact and durable design
- User-friendly operation
- Fast response measurement
- Stable and reliable performance
- Suitable for industrial applications

Advantages

- Accurate and reliable leveling
- Easy digital readability
- Enhanced precision with machined edges
- Portable and lightweight operation
- Automatic power-saving function
- Suitable for professional applications

Applications

- Construction Industry
- Engineering Applications
- Industrial Alignment
- Workshop Measurement
- Equipment Installation
- Surface Level Inspection
- Precision Alignment Tasks
- Mechanical Maintenance

Category

- Digital Spirit Level
- Precision Measuring Instrument
- Industrial Level Meter
- Construction Measuring Equipment
- Alignment & Leveling Tools

Technical Specifications

Parameter	Specification
Product Type	Digital Spirit Level
Model	PRO-DL120
Length	120 cm
Top Surface Accuracy	0.75 mm/m
Bottom Accuracy	0.50 mm/m
Accuracy	± Degree
Automatic Shutdown	180 Seconds
Battery	1.5V × 2 AAA
Operating Temperature	0°C to 40°C
Display Type	Illuminated Digital Display
Backlight	Automatic
Construction	Machined Precision Edges
